Trans. of Archiv für das Eisenhüttenwesen (West Germany) 1953, v. 26, no. 12 [p. 777-782] [Verein Deutscher Eisenhüttenleute (West Germany) Bericht-990].

DESCRIPTORS: \*Refractory materials, \*Brick, Permeability, Gases, Air

After a complete evaluation of the literature it is shown that the idea of specific permeability to gas was derived from the Hagen-Poiseuille Law. This material quantity was determined on the basis of an empirical law of d'Arcy with an apparatus called the permeometer. The accuracy of this Law of d'Arcy was demonstrated (Materials--refractories, TT, v. 10, no. 12) (over)
